Authorization for this examiner's amendment was given in a telephone interview with Marvin Beekman on March 03, 2005.

In claim 1, line 3, "an" has been changed to --at least one--.

In claim 7, line 2, "insulator" has been changed to --the at least one coil portion--.

In claim 7, line 3, after "insulator", added --positioned--.

In claim 7, line 3, "electrostatic coil" has been changed to --electrostatic conductor--.

In claim 18, line 2, "strip" has been changed to --conductor--.

Claims 20-26 have been cancelled.

The Examiner's amendment has been made in order to comply with the 35 U.S.C 112, second paragraph and to place the application in a condition for allowance.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Art Unit: 2821

The cited art of record fails to teach a communication circuit comprising a driver and a differential amplifier which has a selectable input impedance, wherein a lower first input impedance is used to amplify the received signal from an antenna element, and a higher second input impedance is used to monitor the transmitted signal from the driver as defined in claims 1 and 10. Therefore, claims 1-19 are presently allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
